

Lesson 2- Assignment

Place 5 identities on a scale of likelihood of getting access to a safe abortion and also give your rationale for the same [100-200 words].

In my opinion the following identities are the most likely to be able to access safe abortion services:

- Unmarried persons who are financially independent in an urban setting or semi-rural setting – they would have access to the correct information and the monetary means to afford the service. They would ideally have basic support during the process.
- Young married persons who do not want children or don't want them right now- again in urban setting, the couple would have access to such services and the financial backing for the same and the understanding of the procedure.
- Teenager – since this would be the only way out for them according to the following and unacceptable if they carried the pregnancy to term. The parents would take them for a safe abortion service. Again in a urban to semi- rural setting.
- Courtesans- their profession would not always allow them to continue the pregnancy and for them livelihood will come above parenthood.
- Pregnancy resulting from sexual assault – it might be sort as the only way out.
