

Patient Name: Jiviben K Rathod

Age/Gender: 62 Year(s)/Male

Dob: 28/03/1956

Date: 31/07/2018

Chief Complaints

It is possible that this lady has pulled a muscle in her leg. Diagnosis of a muscle injury when there is no restriction in movement is difficult, and the treatment is the same as for a stress fracture.

Assessment Notes

The patient denies fevers, chills, fatigue, and decreased appetite.

Permanent History

Pleasant, obese 62 year old female currently in no apparent distress.

Lab Report

31/07/2018 11:51 AM - HB:9.7,
